CLAIM AMENDMENTS:

Please amend claims 1, 13 and 23 as follows. The claims currently pending read as follows·

1.   (Currently Amended) A method of generating a list of target devices to be configured in communication with a server, comprising:

creating a first list of target devices to be configured;

identifying at least one addressed target device having an associated network address;

modifying the first list of target devices using the addressed target device; and

generating a modified list of target devices to be configured, wherein the target devices are to be remotely booted by the server.

2.   (Original) The method of claim 1 wherein the addressed target device is listed in at least one information source.

3.   (Original) The method of claim 1 further comprising:

adding the associated network address of the addressed target device to the first list of target devices.

4.   (Original) The method of claim 1 further comprising:

adding the addressed target device having an associated network address to the first list of target devices.

5.   (Original) The method of claim 1 further comprising:

removing the addressed target device having an associated network address from the first list of target devices.

6.   (Original) The method of claim 1 further comprising:

pre-configuring at least one preconfigured target device.

7.   (Original) The method of claim 6 further comprising:

adding the preconfigured target device to the first list.

8.   (Original) The method of claim 1 further comprising:

determining if a target device has an associated network address; and

removing the target device from the modified list of target devices if it does

not have an associated network address.

9.   (Original) The method of claim 1 further comprising:

providing the modified list to the server.

10.   (Original) The method of claim 1 further comprising:

configuring the target devices on the modified list.

11.   (Original) The method of claim 1 further comprising:

examining packet data to determine if a target device has an associated

network address.

12.   (Original) The method of claim 1 further comprising:

examining log data to determine if a target device has an associated network

address.

13. (Currently Amended) Computer program product in a computer usable medium for generating a list of target devices to be configured in communication with a server, comprising:

means for creating a first list of target devices to be configured;

means for identifying with an identification at least one addressed target device having an associated network address;

means for modifying the first list of target devices using the addressed target device; and

means for generating a modified list of target devices to be configured, wherein the target devices are to be remotely booted by the server.

14. (Original) The program of claim 13 further comprising:

means for storing the identification of the addressed target device.

15. (Original) The program of claim 13 further comprising:

means for adding the associated network address of the addressed target device to the first list of target devices.

16. (Original) The program of claim 13 further comprising:

means for adding the addressed target device having an associated network address to the first list of target devices.

17. (Original) The program of claim 13 further comprising:

means for removing the addressed target device having an associated network address from the first list of target devices.

18. (Original) The program of claim 13 further comprising:

means for preconfiguring at least one target device listed in the first list.

19.   (Original) The program of claim 13 further comprising:

means for removing a target device without an associated network address from the modified list of target devices.

20.   (Original) The program of claim 13 further comprising:

means for configuring the target devices listed in the modified list.

21.   (Original) The program of claim 13 further comprising:

means for examining packet data to determine if a target device has an associated network address.

22.   (Original) The program of claim 13 further comprising:

means for examining log data to determine if a target device has an associated network address.

23.   (Currently Amended) A data processing system comprising:

means for creating a first list of target devices to be configured, wherein the target devices are to be remotely booted by the server;

means for identifying at least one addressed target device having an associated network address,

means for comparing the addressed target device to the target devices on the first list; and

means for generating a modified list of target devices to be configured based on the addressed target device.

24. (Original) The system of claim 23, further comprising:

means for storing information about the addressed target device.

25. (Original) The system of claim 23 further comprising:

means for configuring at least one target device.

26. (Original) The system of claim 23 further comprising:

means for determining if a target device has an associated network address.
